

# Eldar Karimov

Red Team Specialist

## About Me

18-year-old cybersecurity specialist with a strong interest in red teaming and offensive security. I enjoy working on projects that deliver creative solutions to modern cybersecurity challenges. Most of my experience comes from hands-on labs, projects, and research, where I focus on real attack scenarios and accurately simulating them to identify vulnerabilities before they can be exploited.

## Education

Western Caspian University  
(2024-2028)

- Computer Engineering

Azerbaijan Cybersecurity  
Center (Jan 2025- July 2025)

- Introduction to Cyber
- Offensive Security

## Languages

- English (C1)
- Azerbaijani (Native)

## Experience

### Deneyap Technology Lab (2024-2025)

- Mentor

### BitGuard (2024-Present)

- Project Founder

## Certificates

- CompTIA Pentest+ (2025/12-2028/12) | [Verify Here](#)
- Algorithmics Programming Competition (2024)

## Soft Skills

- Problem-solving & analytical thinking
- Attention to detail
- Critical thinking under pressure
- Team collaboration & communication
- Creativity in approaching security challenges
- Continuous learning & research mindset
- Time management & task prioritization

## Technical Skills

### Red Teaming & Offensive Security

- Penetration testing and adversary simulation
- Exploitation techniques: XSS, CSRF, SSRF, IDOR, etc.
- OSINT investigations and attack surface enumeration
- Post-exploitation & lateral movement techniques

### Web & Application Security

- OWASP Top 10 vulnerabilities
- Secure session & authentication design
- API and endpoint testing
- CORS and CSRF mitigation

- Initiative & self-motivation
  - Ethical decision-making & integrity
  - Networking & relationship building
  - Documentation & reporting skills
  - Troubleshooting & resourcefulness
  - Strategic planning & risk assessment
  - Observation & situational awareness
  - Conflict resolution
  - Decision-making under uncertainty
  - Multitasking & prioritization
  - Leadership & mentoring
  - Analytical reporting
- 

## **Programming & Scripting**

- Python (Advanced)
- Lua (Advanced)
- Bash (Advanced)
- Ruby (Intermediate)
- Go (Intermediate)
- Rust (Pre-Intermediate)

## **Systems & Infrastructure Security**

- Linux hardening and server configuration
- Windows security, troubleshooting & server configuration
- Network security, firewalls, Nginx configuration

## **Cybersecurity Tools & Frameworks**

- Shodan, Censys, theHarvester, Maltego, Recon-ng, Nmap, Nessus, OpenVAS, Metasploit, SQLmap, Nikto, Burp Suite, OWASP ZAP, Cobalt Strike, BloodHound, Radware
- Custom tool development (e.g., BitGuard)
